

# The life of a PhD

Melpomeni Dimopoulou

# Who I am

- I am Greek and mother of a 9-month-old baby girl
- I am graduate of the Computer Engineering and Informatics department of the University of Patras in Greece
- In 2016 I moved to France to follow a one-year Master program on Computational Biology and Biomedicine
- I have a PhD on the subject of DNA data storage
- In 2022 I created the start-up PEARCODE

# My studies

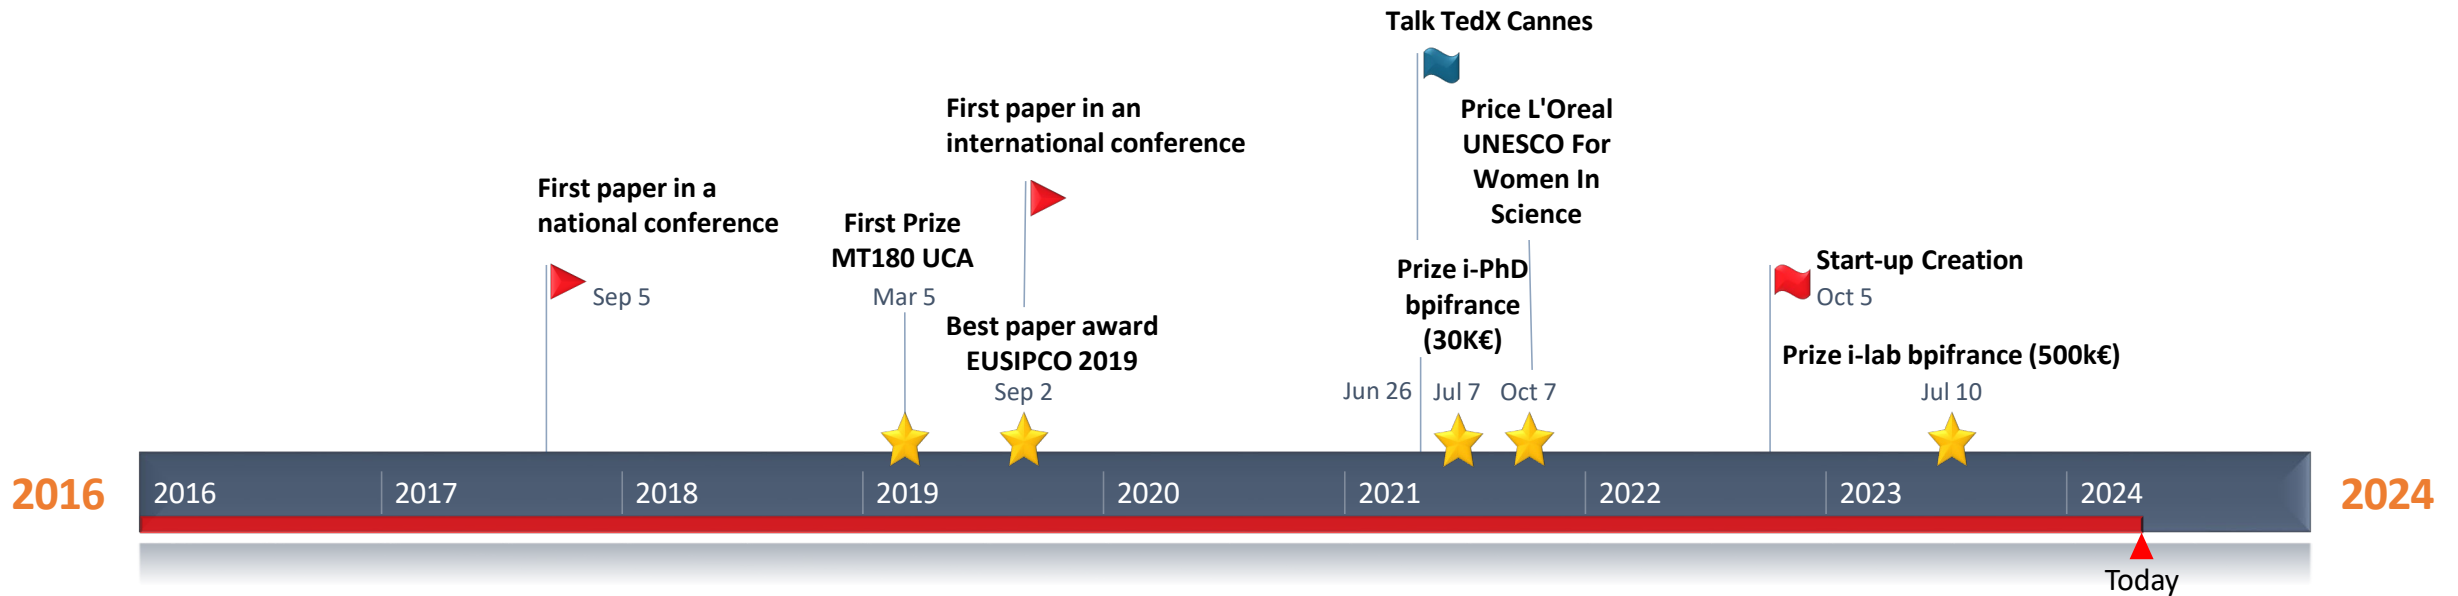

- Bachelor Studies : University of Patras, Greece
- Master Studies: Université Côte d'Azur (UniCA)
- PFE: i3S research lab UMR CNRS and UCA
- Internship: i3S research lab UMR CNRS and UniCA
- PhD: i3S research lab UMR CNRS and UniCA
- Today: Co-founder and CEO of the start-up PEARCODE

UNIVERSITY OF  
**PATRAS**  
ΠΑΝΕΠΙΣΤΗΜΙΟ ΠΑΤΡΩΝ

# A little bit about my career path...

For Women  
in Science

FOND

TEDx Can

Some success stories

Why did I choose  
to do a PhD ?

# The life of a PhD

---

Never boring

---

Very creative

---

Full of surprises

---

Encourages collaborations

---

Facilitates traveling

---

There is no fixed schedule

---

Requires a certain autonomy

---

Requires taking initiatives

# The life of a PhD

- Not an easy path
- Can sometimes seem quite lonely
- It takes some rejections to reach the top
- Writing a manuscript might seem endless
- Quite stressful but at the same time enjoyable

# The conferences

What about the  
teaching ?

---

# And afterwards?

ACADEMIC  
CAREER

R&D IN  
INDUSTRY

START-UP  
CREATION

CHANGE OF  
PATH

## A few tips

- There is no unique key to success
- Don't fear failure/rejection
- Practice makes perfect
- Follow training programs
- Be open to new ideas
- Take some time for yourselves

Why did I do a PostDoc ?

# An intermediate step

To take a breath while doing something that you know how to do well

To identify your career opportunities

To explore a new research topic

To collaborate with new people

To enhance your skills towards an academic career

## The doubts

- Is a PhD career for me?
- What do I want to do?
- Am I good enough?
- And if I fail?

And if I am no  
longer interested  
in academia?

+  
o •

Why did I create a  
start-up

# From research to application

A promising research topic

A motivation to take a turn towards the industry

A passion for what I do

Because I want that my research studies find an application

# The challenges

- It takes a lot of strength and determination
- It takes much training and practice
- Requires a complete change of perspective
- Things are not always facing up
- It takes a lot of risk
- Many rejections towards success
- Development strongly depends on the fundings received
- Every story is different

## Our region offers a great network for start-ups!

- Research labs
- Organizations of Transfer of Technology
- Incubators
- Pôles de compétitivité
- CASA (communauté d'agglomération sophia antipolis)
- And many many others

# Let's discuss!

---
